

Finn Middleton

Entry-Level Web Developer

PROJECTS

Portfolio Website

HTML, CSS, JavaScript, PHP

- Created a visually appealing personal portfolio website that effectively showcases skills, projects, and professional presence. Achieved through meticulous preparation & actively seeking genuine real-world feedback, ensuring a positive user experience.
- Integrated APIs for enhanced features, visual dynamics and functionality of the website for an enriched user experience.

Custom WordPress Website

cPanel, WordPress.org, WPForms

- Utilized WordPress customisation features, such as theme customisation, widgets, and menus, to tailor the website to specific design and functionality requirements.
- Integrated and configured essential plugins for greater functionality, including SEO optimisation, form validation & security features.

Cabin Hire Database

MySQL, SQL, PHP, JavaScript

- Created a comprehensive ERD diagram, outlining relationships among database entities. This resulted in a well-structured blueprint for our cabin hire system.
- Engineered SQL scripts to craft a relational database schema.
- Built a dynamic PHP website to interact with said database, providing a user-friendly interface for both customers and employees.
- Implemented a secure user-authentication system, allowing administrative access to update the database from the web.

VOLUNTEERING ACTIVITIES AND EXTRACURRICULARS

Youth Programming Mentor

Coding Tutor

06/2022 – 04/2023

- Interactive coding workshop tutor, providing engaging presentations on coding principles and guiding young students through hands-on exercises and projects.
- Mentored students in building their first computer game, demystifying programming concepts and kindling a new passion for technology.
